

## Electronic speed supervisor for mining hoist or lifts of any kind

This mining hoist electronic speed supervisor was developed with GENIVAR's expertise in the mining sector, according to the client's actual needs.

The advantages of this speed supervisor are as follows:

1. Few mobile parts
2. Minimum space
3. Practical operator-interface
4. Easy replacement of an existing mechanical system (Lilly®)
5. Braking capacity validation
6. Increased accuracy
7. Custom built autonomous equipment
8. Self-check of the streaming system
9. Complies with mining health and safety regulations
10. Allows preventive maintenance
11. Effective for installation on a new hoist
12. Possibility of remote diagnostic service via Internet

**SAFETY, FLEXIBILITY AND PERFORMANCE**
